

WeatherExtreme Ltd is led by an American Meteorological Society (AMS) Certified Consulting Meteorologist (CCM). In addition, Dr. Elizabeth Austin, CCM, has served on the Board of the CCM program and has been Chair of the Board of the CCM program. Since 1957, the American Meteorological Society has awarded the designation of Certified Consulting Meteorologist (CCM) to individuals who have demonstrated to a Board of their peers that they possess the knowledge, experience, and character to professionally and competently serve the public as meteorological subject matter experts. The primary purpose of the program is to enable users of meteorological services to select consultants with the confidence that they will receive high quality, authoritative and ethical professional counsel.

The CCM program is a public service administered by the AMS. The essential attributes of a CCM are a specialized knowledge combined with a broad background, an ingrained concept of service, and a clear and unwavering adherence to the rules of professional conduct. The program includes a mandatory continued professional development component to ensure that active CCMs maintain currency in the rapidly evolving disciplines of the atmospheric sciences.
